Audience profile builder

Your personas say what you hoped. Your call notes say what customers actually think.

Claude turns sales call notes, reviews, survey answers and support tickets into audience profiles that drop straight into your content studio, with the customer's own words as evidence for every pain and objection.

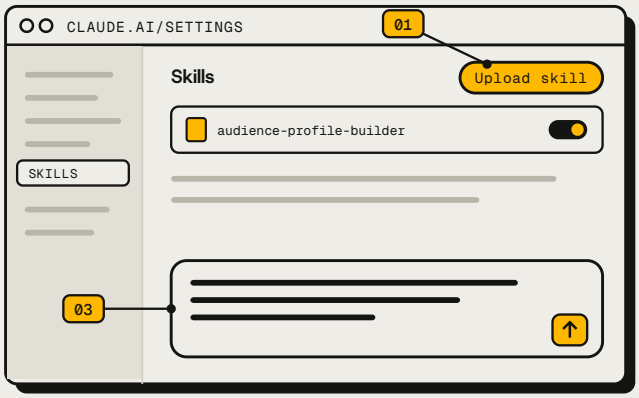

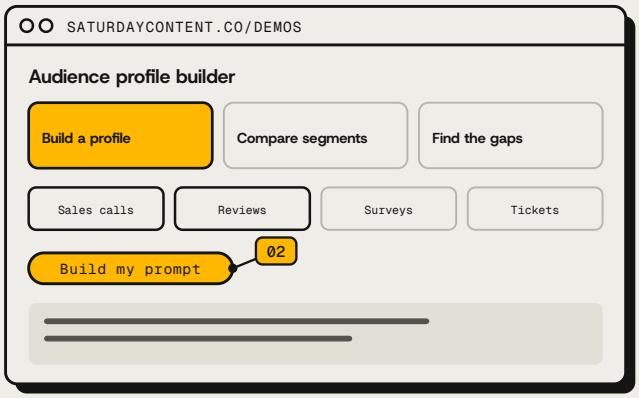

TRY THE LIVE DEMO ↗

FREE · DOWNLOAD THE SKILL AT SATURDAYCONTENT.CO

https://saturdaycontent.co/demos/audience-profile-builder.html

Get started in a few clicks.

Have a Claude account

01 Download the skill and add it to Claude

02 Start a chat and paste research for one audience

03 Ask Claude to build a profile, then copy the library entry

New to Claude

01 Create a free account at claude.ai

02 Turn on skills, then add the downloaded skill

03 Paste some research and ask Claude to build a profile

GOOD TO KNOW

Pro tip

Label each block of research with a # line naming the source and role, so Claude can tell one loud customer from a real pattern.

Make it yours

Every template is a starting point. Rename sections, cut what you don't need, and add what your team does differently.

WHAT'S INSIDE

01

Profiles from real research

Paste call notes, reviews, survey answers, tickets or transcripts. Claude codes every line into pains, objections, goals and metrics, then writes the profile.

02

Evidence for every claim

Each pain and objection comes with short quotes copied from your research. The page checks every quote against what you pasted and flags any that don't match.

03

Compare two segments

Paste research for two groups and see where they really differ, what to say to each, and which differences might only be sample size.

04

Find the gaps

See which profile fields your research covers and which it doesn't, then get interview and survey questions to close the biggest gaps.

05

An evidence board that works offline

Pasted research is split into lines and tagged as pain, objection, goal, tool or metric in your browser, with counts, so you can see what's thin before you start.

06

Ready for your content studio

Copy any profile as a library entry in the B2B content studio's exact format. Placeholders mark what your research doesn't say yet.

Build it on your own research.

01 **Try the demo**
Open the page with the sample Fieldbook research loaded. Check the evidence board, then look at the worked example for each mode.

02 **Add the skill**
Download the skill and add it to Claude as a skill. It appears in your skills list as audience-profile-builder.

03 **Gather your research**
Export a few call notes, reviews, survey answers and tickets for one audience. Put one point per line and a # line above each source.

04 **Build your first profile**
Ask Claude to build a profile from it. Check the evidence, fill the placeholders, and run Find the gaps to plan your next interviews.

05 **Publish it for your team**
Ask Claude to publish the builder page with your company and voice. Teammates paste research and generate profiles on their own Claude accounts.
