# Editorial calendar planner

## Turn goals, launches and team capacity into a 13-week content calendar that fits the team you have.

Plans a quarter of B2B content around your launches, pillars and cadence, checks every week against capacity, then has Claude write a title and angle for each slot and propose changes to hit your goals.

# Get started in a few clicks.

## Have a Claude account

01 Download the skill and upload the .zip as a custom skill in Claude

02 Start a chat and say: plan next quarter's content calendar

03 Ask Claude to publish your planner page for the team

## New to Claude

01 Create a free account at claude.ai

02 Check that your plan includes skills, then add this skill

03 Start a chat and give Claude your goals, launches and team size

GOOD TO KNOW

Pro tip

Leave about 15% of capacity unplanned. Launch weeks and surprise requests will use it.

Make it yours

Every template is a starting point. Rename sections, cut what you don't need, and add what your team does differently.

WHAT'S INSIDE

01

### A real plan without Claude

The planner runs in your browser. Change a date or a cadence and the 13-week calendar rebuilds instantly, the same way every time.

02

### Launch lead time built in

Each launch, webinar or event gets a teaser, launch-day pieces and three weeks of follow-up, and takes over evergreen slots instead of piling on.

03

### Capacity you can see

Every piece has an effort cost. Weeks over capacity are moved where possible and flagged in red where they can't be.

04

### Pillars rotated evenly

Evergreen slots rotate through three to five pillars, balanced across the quarter and around each launch's own theme.

05

### Fill and rebalance with Claude

Claude writes a working title and angle for every slot, straight into the grid, or reviews the plan and proposes specific changes within capacity.

06

### Ready for your sheet

Switch between grid, list and per-week counts, then copy the whole calendar as CSV or paste it straight into Google Sheets or Excel.

# Build it on your own quarter.

**01** **Try the demo**
Open the planner with the Fieldbook sample: a Q1 with two launches and a webinar. Change a cadence or a date and watch the calendar rebuild.

**02** **Add the skill**
Download the skill and upload the .zip as a custom skill in Claude.

**03** **Give Claude your quarter**
Share your start date, goals, launches, pillars, cadence and capacity. Claude checks the math before it plans.

**04** **Get the calendar**
Claude lays out every slot, flags weeks that don't fit, and builds a spreadsheet if you want one.

**05** **Publish the planner**
Ask Claude to publish your planner page. Your team adjusts it, copies it to Sheets, and fills or rebalances it with Claude.
