# Content audit

## Know which pages to keep, refresh, merge or retire, and why, before you touch a single URL.

Scores every page in your content inventory as Keep, Refresh, Merge or Retire with transparent rules, suggests a redirect target for each page that goes, and has Claude write the prioritized plan and refresh briefs.

FREE · DOWNLOAD THE SKILL AT SATURDAYCONTENT.CO

https://saturdaycontent.co/demos/content-audit.html

# Get started in a few clicks.

## Have a Claude account

01 Download the skill and add it in Claude

02 Attach your inventory CSV in a new chat

03 Ask Claude to audit it with the content-audit skill

## New to Claude

01 Create a free Claude account at claude.ai

02 Check that your plan includes skills

03 Add the skill, then attach your inventory and ask for an audit

GOOD TO KNOW

Pro tip

Use at least 12 months of data and include last period's sessions, so seasonal pages aren't retired and slipping pages get caught.

Make it yours

Every template is a starting point. Rename sections, cut what you don't need, and add what your team does differently.

WHAT'S INSIDE

01

### A verdict for every page

Keep, Refresh, Merge or Retire, each with the reason in plain words. No black-box score to argue about.

02

### Scores in your browser

Upload a CSV, map the columns, and get the full table without Claude. Your data stays on your machine until you choose to generate.

03

### Finds near-duplicates

Pages with overlapping titles on the same topic get matched, and the weaker one is set to merge into the stronger URL.

04

### Redirect targets included

Every merged or retired page gets a suggested target that is still live. Copy the whole redirect map in one click.

05

### Rules you can tune

Thresholds for old, low traffic, declining and duplicate live in one commented block. Change them and the audit reruns.

06

### A plan and briefs from Claude

Claude reviews the scored table cluster by cluster, writes a prioritized plan, and drafts a refresh brief for each top candidate.

# Build it on your own inventory.

**01** **Try the demo**
Open the page with the sample inventory of 62 invented Fieldbook pages. Click a verdict tile, sort the table, and look at the clusters.

**02** **Add the skill**
Download the content-audit skill and upload the .zip as a custom skill in Claude.

**03** **Export your inventory**
Pull the page list from your CMS and sessions and conversions from analytics, then join them into one CSV. The guide in the skill has the steps.

**04** **Run the audit**
Attach the CSV and ask Claude to audit it. Check the verdicts, tune any rule that feels off, and ask for the plan or refresh briefs.

**05** **Share the audit page**
Ask Claude to publish the audit page for your team. Anyone can upload next quarter's export and get the same scoring.
