Style guide checker

Edits that cite the rule they apply, so writers learn your style guide instead of arguing with it.

Paste a draft and get line edits against your team's style guide, each tagged with a rule ID and severity, plus a clean revised version. It also rewrites drafts to style and explains any rule with do and don't examples.

https://saturdaycontent.co/demos/style-guide-checker.html

Get started in a few clicks.

Have a Claude account

01 Download the skill and add it to Claude

02 Say "Import our style guide" and paste it in

03 Ask Claude to publish your checker page

New to Claude

01 Create a free Claude account at claude.ai

02 Check that your plan includes skills, then add this skill

03 Paste your style guide and ask Claude to import it

GOOD TO KNOW

Pro tip

Give every rule a real don't example from your own drafts; the checker cites rules more accurately when it has seen them broken.

Make it yours

Every template is a starting point. Rename sections, cut what you don't need, and add what your team does differently.

WHAT'S INSIDE

01

Line edits with rule IDs

Every edit shows the line, the rule it applies and its severity, then the before and after. Writers see why, not just what.

02

Three modes

Check a draft for a full edit, rewrite to style for just the clean version, or explain a rule when someone asks why.

03

A quick check in the browser

Avoid-list words, exclamation points, Title Case headings, long sentences, likely passive voice and vague link text are highlighted as you type, with no Claude usage.

04

Your guide, imported

Paste your style doc and Claude splits it into numbered rules with severity, examples and a word list of terms to use and avoid.

05

Focus and strictness

Narrow a pass to one category, such as accessibility, or to must-fix issues only when the deadline is close.

06

A page your team can share

Publish the checker as a private page. Each teammate edits with Claude on their own account, and everyone checks against the same guide.

Build it on your style guide.

01 **Try the demo**
Open the checker and look at the sample Fieldbook draft. The quick check highlights its style breaks, and the worked examples show a full edit, a rewrite and a rule explained.

02 **Add the skill**
Download the style-guide-checker skill and upload the .zip as a custom skill in Claude.

03 **Import your guide**
Start a chat, say "Import our style guide", and paste or attach it. No guide yet? Claude interviews you and drafts one.

04 **Check the rules**
Claude shows every rule with its ID, severity and whether the quick check covers it, plus your word list. Correct anything before you say yes.

05 **Publish and share**
Ask Claude to publish your checker page, then share it with your team. Paste a draft, read the flags, and ask Claude for the full edit.
