B2B content studio

On-message B2B content for every persona, industry and funnel stage, without starting from a blank page.

A Claude skill that turns your messaging into a content studio. Pick a format, persona, industry and funnel stage, then draft, remix, critique or brainstorm with Claude, grounded in what you actually say about your product.

Get started in a few clicks.

Have a Claude account

01 Download the skill and upload the .zip as a custom skill in Claude.

02 Start a chat and ask Claude to build your messaging library. Attach any positioning or persona docs you have.

03 Ask Claude to publish your studio page, then share it with your team.

New to Claude

01 Sign up at claude.ai and check that your plan includes skills.

02 Try the live demo first. Pick a mode and targets, then paste the prompt it builds into any Claude chat.

03 When you want your own messaging in it, follow the steps on the left.

GOOD TO KNOW

`Pro tip`

Put real proof points in your library. The studio never invents numbers or customer names, so the proof field is what makes drafts publishable.

`Make it yours`

Every template is a starting point. Rename sections, cut what you don't need, and add what your team does differently.

WHAT'S INSIDE

01

Four ways to work

Draft a new piece, remix one you already have, get a scored critique with rewrites, or brainstorm ideas and whitespace.

02

A library that does the briefing

Each persona and industry carries its goal, pains, proof points, objections and what to avoid, so every request starts fully briefed.

03

Picks that change the writing

Format, persona, industry and funnel stage each bring their own playbook. A top-of-funnel LinkedIn post and a bottom-of-funnel product page come out very differently.

04

No made-up proof

The studio only cites proof points from your library. Where evidence is missing, it leaves a clear placeholder instead of inventing a stat.

05

In chat or as a team page

Ask Claude directly, or publish a studio page your team can use. On the page, Claude writes on each person's own account.

06

Built from what you have

Claude builds the messaging library from your positioning docs, persona one-pagers and sales decks, or interviews you if there's nothing written down.

Build it on your messaging.

01 **Try the demo**
Pick a mode and targets in the live demo. It builds the full prompt for you to paste into Claude and shows a worked example for each mode.

02 **Add the skill to Claude**
Download the skill and upload the .zip as a custom skill in Claude.

03 **Build your messaging library**
Ask Claude to build your library and attach any positioning, persona or sales docs. No docs? Claude interviews you instead.

04 **Publish your studio**
Ask Claude to publish your studio page, then share it with your team. Each person writes with their own Claude account.

05 **Write on message**
Draft, remix, critique and brainstorm. When your messaging changes, ask Claude to update the library and republish.
